

Aircraft Acquisition

Sales Consulting Division

Our mission at **EXCLUSIVE CHARTER SERVICE** is to guide you through the purchasing process of your perfect, private aircraft.

We pride ourselves on our unique approach in how we represent someone looking to acquire an aircraft.

Our approach is designed to create a very easy and reliable service that allows us the opportunity to build and maintain long-lasting relationships with our clients.

A group of business professionals in a meeting, looking at documents and laptops. The image is dimmed and serves as a background for the text.

We believe in educating our clients of the subtleties and nuances of the private aviation market. We prepare budgets so that buyers understand what exactly variable costs vs fixed costs are.

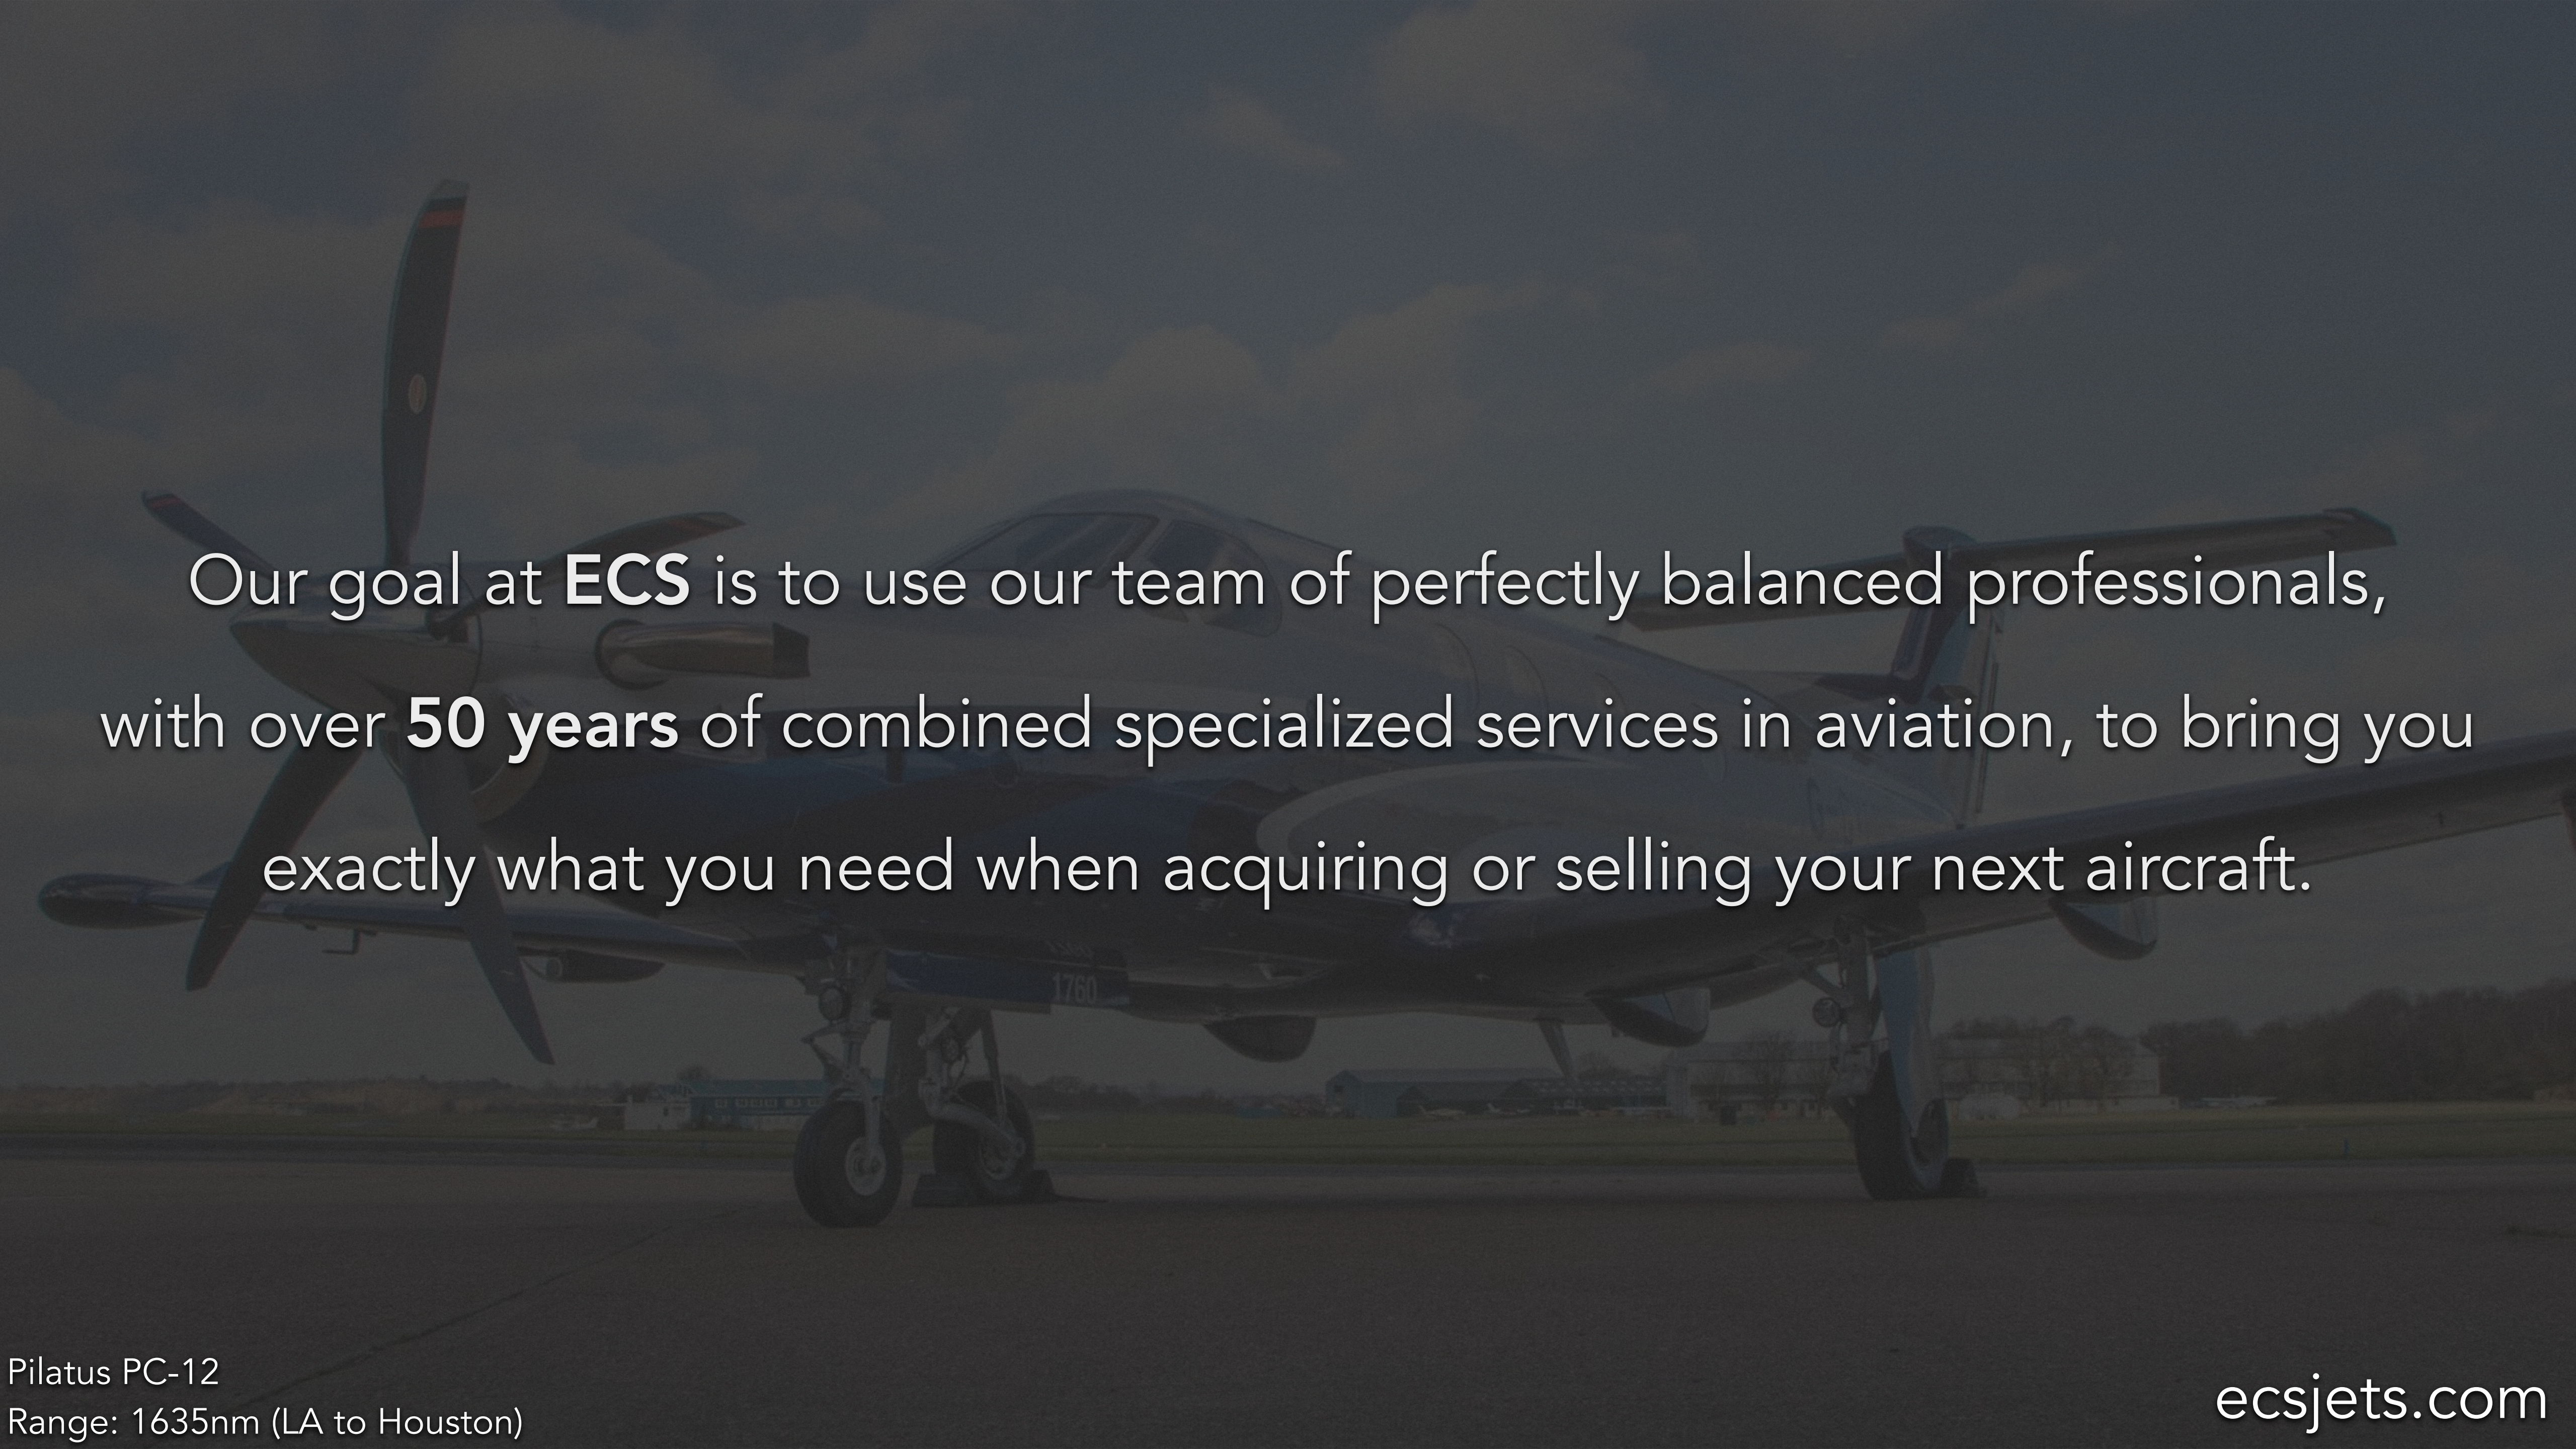

We will teach buyers how to prepare for projected maintenance costs, as well as what engine or airframe maintenance programs make the most sense for your specific aircraft.

There are many unexpected expenses to new buyers.

We **COMPLETELY ELIMINATE** that issue by preparing you with a 1-5 year budget for the exact aircraft you purchase **BEFORE** you purchase.

Remember, every aircraft has a different maintenance schedule and sometimes the broker may forget to tell you vital information, such as half a million dollar inspection dues that are mandatory every couple of years.

A Pilatus PC-12 aircraft is shown on a tarmac, viewed from a low angle. The aircraft is dark-colored with a white propeller. The background is a hazy, overcast sky. The text is overlaid in white, centered on the aircraft.

Our goal at **ECS** is to use our team of perfectly balanced professionals, with over **50 years** of combined specialized services in aviation, to bring you exactly what you need when acquiring or selling your next aircraft.
